Statistics of "debits" refer to all trading banks operating in New South Wales (excluding Central Banking business of the Commonwealth Bank) and were first collected in September, 1945.

In previous issues of the "Statistical Bulletin", trends in the amount of payments made by cheque were illustrated by use of statistics of inter-bank clearings, Sydney (including all accounts of Australian Governments). The comparability of these statistics was affected by the amalgamation of two major banks from 1st October, 1951.

No. 82.—Stock Exchange Index (Sydney).

The following index of the values of the principal Company shares on Sydney Stock Exchange embraces the ordinary shares of companies (excluding banking companies) whose business is conducted wholly or largely in New South Wales.

The prices of individual shares are unweighted, and each group average is the mean of the average monthly prices per £1 of paid-up capital. The aggregate index is the average of all the shares included in the groups with the addition of 24 miscellaneous shares. There is no base period as the index represents the ratio per cent. of the average prices of ordinary shares to their par values, adjustment being made where capital is written off or bonus shares are issued.

Average for Period.	23 Manufacturing and Distributing Companies.	10 Retail Companies.	8 Public Utility Companies.	5 Pastoral and Finance Companies.	5 Insurance Companies.	Total 75 Companies.	34 Active Shares included in foregoing.

No. 88.—Export Price Index-Numbers—Australia.

(Compiled by the Commonwealth Statistician.)

These index-numbers are compiled from the prices of 20 commodities which constitute at present about 80 per cent. of all exports. In calculating the index for "All Groups," prices of the commodities are weighted by the average annual exports (production in the case of gold) during the three years, 1933-34 to 1935-36.

No. 89.—Wholesale Price Index-Numbers—Basic Materials and Foodstuffs.

(Compiled by the Commonwealth Statistician.)

The price quotations in the main have been obtained directly from manufacturers and dealers, and, with a few important exceptions, from Melbourne sources. Apart from home-produced building materials, coal and one or two minor commodities, however, the price movements may be taken as representative of fluctuations in wholesale prices of basic materials in most Australian markets. The weighting system adopted is based on average annual consumption during the years 1928-29 to 1934-35 inclusive.

From August, 1950, to 30th June, 1951, a bounty was paid on raw wool purchased for local manufacture. The effective price, that is the open market (auction room) price less bounty, has been used in calculating the index number in this table.
